“ Elizabeth was one of the leaders in the Michigan sonographer community serving in a number of roles until finally becoming the President of our professional organization from 1987-1988. Liz was always a positive influence on anyone she met. She shared her knowledge willingly with many students and new graduates of sonography programs. She belonged to the exclusive club of multi-modality sonographers, having mastered General ultrasound, Vascular and Echocardiography. The Michigan Sonographers' Society continues today in part to the dedication of volunteers who inspire like Liz Drewek.
